The Cala Corb development is located in one of the most charming coves of Es Castell, Cala Corb. The project is currently in the basic design phase and a basic study indicates that up to 18 homes could be built subject to building regulations. Possibility of underground parking on a plot with magnificent views of the cove and the mouth of the Port of Mahon. This is an ideal investment opportunity overlooking the sea and the developing area of Cala Corb, which is currently having a walk way built around it and more moorings will be added. This is a fantastic development for holiday homes, new homeowners and the rental market. At the present moment there is a property in a poor state of repair on the plot.
